## Actuarial Exams

Exam P (Probability)

Preliminary Pass (November 2025)

## Technical Skills

R, MATLAB, Python, Excel, LaTeX, GitHub, PowerBI, Power Query

## Education

**University of California, Irvine**

*BS in Applied and Computational Mathematics*

Sept 2021 - Jun 2025

(Obtained June 2025)

- GPA: 3.54/4.0

- **Coursework:** Mathematical Machine Learning, Statistics for Data Science, Numerical Analysis, Mathematics of Finance, Fixed Income, Probability, Technical Writing, Mathematical Modeling

## Experience

Mentor

*Math CEO*

Irvine, CA

January 2024 - April 2024

- Engaged with high school students in low-income, diverse areas in inquiry-based activities with a strong emphasis on mathematics and other topics in STEM
- Collaborated with other mentors in curating new activities and maintaining student involvement
- Led group activities and encouraged conversation through icebreaker questions, active listening, and by introducing new ideas
- Learned how to partition challenging concepts into smaller, digestible problems

Self-employed

*Private Tutoring*

San Diego, CA

Sept 2020 - June 2021

- Provided one-on-one instruction to middle and high school students to prepare for academic tests and improve academic performance in mathematics
- Prepared lessons and supplements to monitor and assess student progress
- Developed study strategies and time management skills depending on each student's needs and learning styles
- Demonstrated various problem-solving methods to allow better understanding of a concept
- Helped three students achieve their academic goal

## Projects and Personal Initiatives

Machine Learning on Adult Census Income Dataset

[ML Project repository](#) ↗

- Developed a report, following PEP8 style guidelines, on machine learning algorithms designed to predict and identify trends within a U.S. census dataset.
- Applied libraries such as Scikit-learn, Seaborn, and Matplotlib to perform exploratory data analysis
- Tools Used: Python, Excel

Quantitative Analysis Project

[PDF File](#) ↗

- Given recent OHLCV price history data in the S&P 500, identified equity factors and reasonable Key Performance Indicators (KPIs) while providing reasons for their individual strengths and weaknesses.
- Employed time series analysis to test portfolio performance under a momentum factor.
